PART E

TERMS OF REFFERENCE

THE TERMS OF REFERENCE AND PROJECT BRIEF: APPOINTMENT OF TRANSACTION ADVISORS TO PREPARE A REPORT ON INTERNATIONAL BEST PRACTICES IN MANAGEMENT OF THE PROCESS OF WINDING DOWN LONG-TERM POWER PURCHASE AGREEMENTS AND THE DEVELOPMENT OF A FRAMEWORK FOR IMPLEMENTATION UNDER THE REIPPPP FOR A PERIOD OF EIGHTEEN (18) MONTHS.

1. Introduction

This document serves as the requirement of the IPP Office for a study to be undertaken by a team of consultant appointed by the DBSA and funded under a grant by KfW. The requirements as specified in this document are to be followed for developing proposals by respondents.

2. Background

In terms of Section 34 of the Electricity Regulation Act (ERA), the Minister has designated the procurer of new generation capacity from IPPs as the Department and Eskom as the designated buyer of this electricity procured as per several Determinations issued by the Minister since 2010. The Department, through mandate instructions, have mandated the Independent Power Producers Office (IPPO) to procure the determined energy from IPPs on its behalf, through the Independent Power Producer Procurement Programme ("IPPPP"). The Renewable Independent Power Producer Procurement Programme (REIPPPP) has been very successful over the last 10 to 12 years to bring new Solar and Wind Capacity online. To date 110 projects have been procured bringing more than 8000 MW of renewable energy online. The Power Purchase Agreements (PPAs) and Implementation Agreements (IAs) signed with Eskom and the Department of the earlier rounds or bid windows under the REIPPPP has reached the 10 years plus milestone. These PPAs were signed for 20 years and include the obligation for the Seller/Independent Power Producer (IPP) to provide for the decommissioning of the project at the end of the contract through the establishment of a decommissioning trust and to give effect thereto at the end of the PPA term. The lifting of the cap or licencing threshold for private power generation, the process of unbundling of Eskom and the operationalization of the National Transmission Company of 4 South Africa

(NTCSA) in July 2024, has created the opportunity to leverage the residual capacity of these projects either as part of a new Power Purchase Agreement (PPA) entered into with the Buyer or through bilateral contacts. The main consideration would be to ensure that the consumer receives the benefit of the original investment underpinned by a government support regime, post the PPA term both in terms of cost-effective tariffs and security of supply.

The Department and IPP Office therefore require a skilled and experienced team of advisors to undertake the study and make recommendations on options for implementation. The Department is responsible for policy and enabling regulations and legislation and the IPP Office is a key enabler of the procurement programmes. This study will highlight strategic considerations for the IPPO and the Department as part of the transition to greener electricity and economy to ensure a coordinated process in winding down PPAs at they reach the end of the contract period.

3. Scope of work

The IPP Office is looking to procure the services of a suitably qualified and experienced advisor or team of advisors to apply international best practises in preparing a report including a framework for implementation to be considered by the IPPO, the Department and National Treasury. The Transaction Advisor (TA) is required to perform the following activities but not limited to:

- Conduct extensive research on international best practices in winding down long-term PPAs in the renewable sector.
- Analyze and present case studies from other countries that have gone through a similar process.
- Analyze existing PPAs with regard of contractual obligations of IPPs to decommission after concluding the PPA and make recommendation to improve legal framework of the REIPPP going forward.
- Present an option analysis setting out the advantages and disadvantages of different options for consideration, including the quantification of the potential benefit to the consumer.
- Workshop options for implementation with all stakeholders.
- Prepare a final recommendation for approval.
- Develop a Framework for implementation of the winding down process, considering the context of REIPPPP, the role of the Department and the Buyer (past or future) as

signatories to the IA and PPA, the role of the Regulator in terms of the future benefit to the consumer in the form of cost and security of supply outcomes.
