Terms of Reference

INTERNET BANDWIDTH AND RELATED WAN
SERVICES
SEPTEMBER 2024

1. Introduction

The Development Bank of Southern Africa (the “DBSA” or the “Bank”) primarily plays a key role in the planning, preparation, funding, building and maintenance phases of the infrastructure development value chain. All the value chain components incorporate fundamental administrative activities such as documentation, procurement, and reporting. The diagram below illustrates our infrastructure value chain, numerous services, and key target markets per value chain segments.

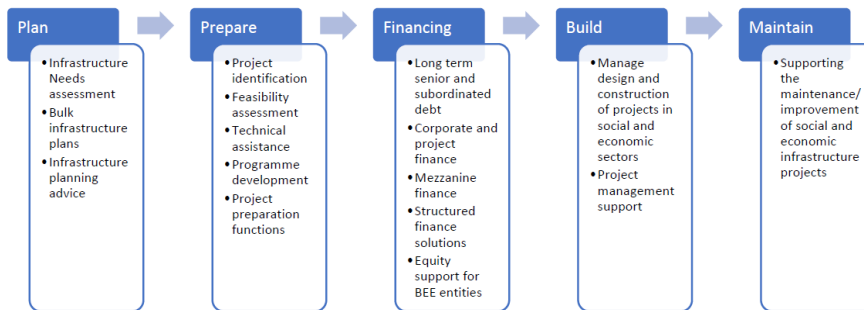

FIGURE 1: DBSA VALUE CHAIN

South Africa has concluded various binational and trade agreements with countries across the continent to support broader regional integration in line with the SADC (Southern African Development Community) Integrated Infrastructure Development Plan, the Programme for Infrastructure Development in Africa (PIDA) and AU (African Union) Africa Agenda 2063. The regional development and integration strategy of the DBSA is aimed at both SADC and the rest of Africa.

2. Purpose

The purpose of this document is to detail the Terms of Reference (ToR) for the appointment of a reputable internet service provider to provide Internet bandwidth, related Wide Area Network (WAN) services and support to the DBSA over a period of 60 months.

3. Background and Context

Currently, the implementation of Wide Area Network (WAN) services for the DBSA, and related ICT infrastructure, have been consolidated, maintained, and supported through the utilization of a Multiprotocol Label Switching (MPLS) Service Provider. The current bandwidth and Internet support contract is ending. The DBSA has also been growing over the last few years. This has now necessitated an upgrade in Internet bandwidth, WAN services and support.

Current services such as the MS Azure environment and Silver Peak (Software-Defined Wide Area Network) SD-WAN provide express route technology to MS Office services and also a VPN Tunnel to our MS Azure tenant.

Services currently being accessed from the Data Dimension (DD) Nippon Telegraph and Telephone Public Corporation (NTT) MPLS are Standard Bank, Besa, and Swift/Trustlink).

The DBSA now intends to appoint a partner with a suitable Internet Service Provider that will meet the scope of work as stated in these terms of reference. The overall objective is to enable a fit for purpose, resilient and future-proof WAN design.

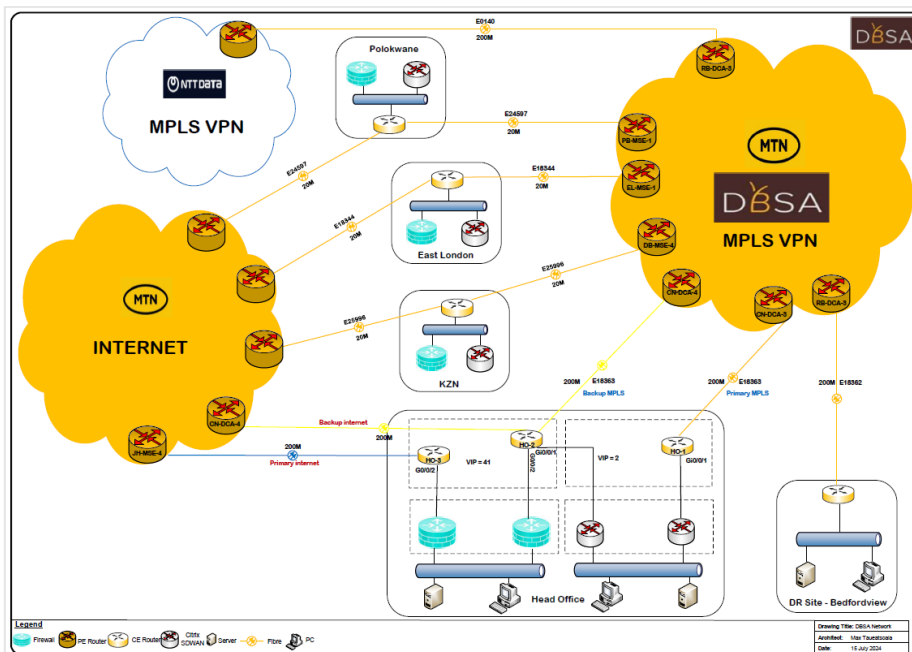

FIGURE 2: DBSA WAN ARCHITECTURE (MPLS AND DIA)

4. Scope of Work

The successful bidder will be expected to provide the following scope of work as specified in the functional requirements section of this ToR as detailed below:

 - 4.2.2. When conducting the review, it is critical that the successful bidder assess all the key focus areas (including objectives, scope, and requirements) to ensure that they propose a suitable solution. Provide Direct Internet Access (DIA) networking routing technology by converting the current Multiprotocol Label Switching (MPLS) for all four (4) DBSA branches to DIA.
 - 4.2.3. Cancel Head Office MPLS links only if there is an alternative to MPLS, as DBSA has services that are accessed via Nippon Telegraph and Telephone (NTT) Data MPLS.
 - 4.2.4. Provide an increase in bandwidth for DBSA office locations.
 - 4.2.5. Provide a well-networked WAN bandwidth infrastructure.

- 4.2. WAN services
 - 4.2.1. Provide a future-proof WAN network design and services addressing all the key services required by DBSA.
 - 4.2.2. Ensure availability and reliability of the DBSA WAN.
 - 4.2.3. Provide scalability and flexibility within the WAN to accommodate any business and operational changes in the future.
 - 4.2.4. Provide data, voice, and services across the WAN.
- 4.3. Support services
 - 4.3.1. Provide support on the Internet and WAN services over a 5-year period.
 - 4.3.2. Ensure integration with third party service providers and the confidentiality, integrity, availability, and security of data transmissions always for all services.
